
COURSE: Global Health Systems
PROFESSOR: Adriano Massuda and Ana Maria Malik
DEPARTMENT: Management and Human Resources

1º/2024

FACULTY

Adriano Massuda is a doctor, with medical residence in Preventive and Social Medicine and in Health Administration and PhD in Health Policy, Planning and Management. He worked in different positions in the Brazilian Health System: doctor in the Primary Care Unit and teaching hospital; municipal secretary of health in Curitiba; deputy executive secretary and secretary of Science, Technology and Strategic Products at the Ministry of Health. He was a visiting researcher at the Harvard T.H. Chan School of Public Health and advisor of the Pan American Health Organization.

Ana Maria Malik is graduated in Medicine from the University of São Paulo (1978), Master in Business Administration from the Getulio Vargas Foundation - SP (1983) and Doctor of Medicine (Preventive Medicine) from the University of São Paulo (1991). She is a full Professor at FGV EAESP (Department of General Administration and Human Resources) and an academic elected to the Brazilian Academy of Quality. Currently, she is a coordinator of the health major of the Professional Masters in Management for Competitiveness (MPGC) at FGV EAESP. She was a director of public and private hospitals, as well as a public manager linked to the State and Municipal Health Departments of São Paulo. She has acted and still works in Councils linked to public and private organizations. She is a member of the GENiE group (the Global Educators Network for HealthCare Innovation Education) and the Advisory Panel on the Value Based Healthcare of the Economist Intelligence Unit (EIU).

COURSE OVERVIEW

The main trends, challenges, opportunities, and strategies to face current health problems affecting the world.

Course Overview

The course is organized into two parts.

The first part covers the fundamentals of global health, addressing its development as a field of study, research, and practice; global health governance and the role of International Organizations; and the global health agenda with focus on universal health coverage.

The second part explores Health system responses to Global Health Challenges in different countries' context, addressing the state of global health and its determinants.

COURSE OBJECTIVES

1. Describe and discuss the fundamentals of Global Health and Health systems;
2. Present global health governance and international health institutions.
3. Critically analyze and discuss countries' current health situation, including recently published research.

PERFORMANCE EVALUATION

Attendance and participation – 30%
Continuing participation and handing in papers – 30%
Final paper/presentation – 40%

Class Participation is a fundamental feature of this course. Reading assigned material prior to classes and preparing to engage in fruitful discussion are demanded.

LEARNING/TEACHING

All deliverables are due by 7:00 PM São Paulo Time on the due date.

Students are expected to attend all sessions and participate actively in the class, through questions and comments online.

Sessions are scheduled Wednesdays from 7:00 AM to 10:50 AM São Paulo Time.
